EIGHT FEET OF ORE

Fine Disclosure of Copper in the Centennial.

APPROACHING MAIN CHANNEL

Gold and Silver in Character-Istic Values.

Another Instructive Lesson on the Continuity of the Ore Chutes in Tintic Limestones.

Eight feet of ore containing from \$ to 4 per cent copper, with characteristic values in gold and silver, is the story briefly told of a disclosure on the 1450foot level of the Centennial Eureka, and to inquire into which Managing Director Holden and General Superintendent Allen departed for camp last night. In the average property the management would have characterized it as "a strike." Not so with that of the Tintle bonanza, who explained it as simply one of a number of "small arteries" leading to the main channel, which latter Superintendent Brown believes he is rapidly approaching. Upon the level above the main channel reveals a width which is extraordinary, even for the limestones of Tintic, and that this will be maintained on the lower level there is no reason to believe other. The level on which the new ore has appeared by on which the new ore has appeared in 1600 feet below the collar of the shaft, with a total depth of 2300 feet below the summit of Eureka peak, and is the greatest depth measured from that horizon which has been attained south of the guich through which the line beof the guich through which the line between the north and south divisions on the great zone is drawn. While eight feet of ore, contrasted with that contained in the main channels of the Centennial Eureka, appears dwartish, all mines in the camp have not been endowed as has this one, with its bullion record towered into millions, and in any other property it would undoubtedly go into history as a most important dis-closure. Certainly it indicates that the management is within a few shots of the main ore bodies, while demonstrat-ing that at 1600 feet the company has added another million or more to its re-

RATIFIED THE OPTION.

Shareholders of Copper Mountain Concur in \$125,000 Deal.

The option recently executed by the board of directors on the properties of the Copper Mountain Mining company, consisting of seven locations north of the O. K. group out of Milford, and under which W. J. Bowering obligates his syndicate to pay no less than \$125,000, was yesterday ratified by the share-holders in special session, and with it a more vigorous campaign of development will be inaugurated. Indeed, it was brought up from camp last night that in the property has just been made a strike in which no less than eight a strike in which has been exposed, the samples which were exhibited at Milford indicating the presence of material conlaining as much as 30 per cent copper while the average compares favorably with the best that has been encountered in the big district.

Peter Martin, who came in from the region during the day with samples of high-grade ore from the properties of the Milford Mining and Milling com-pany, says that while he had no per-sonal knowledge of the discovery at the Copper Mountain, the management was making no secret of it, and that the report is generally credited. The entire district, says Mr. Martin, is looking well, and the developments of the present season promise to place it aloneside the most productive in the State. While nothing definite was to be learned re-garding the strike in the Copper Mountain, nor was it referred to by President Lloyd in discussing the meeting of the shareholders, the story is not at all un-

MAMMOTH'S SILICATES.

Management Prepared to Put 5000 Tons Monthly on Market.

The shareholders of the Mammoth Mining company will meet on Tuesday next in annual session, and then the mutter of reducing the large volume of low-grade ore now blocked out in the old proposition will be exhaustively ex-Superintendent Samuel McIr blocked out is enough to enable him to put out nearly 5000 tons monthly for at least a year, while it is going to greater depths with the same energy. These ores, it is said, will average \$10 per ton, while associated with them, of course, is a rock of better quality, and which affords a margin under present condi-

GOLD STRIKE IN WYOMING.

Northern Laramie County Scene of Latest Excitement.

Sunrise, Wyo., Jan. 28.-Northern Laramle county is in a tunuit of excitement over a bonariza gold strike made this week In Mushrat canyon. Prespectors are flowin austrat canyon. Prospectors are now-tog into the district by scores and every foot of ground for miles around is being stated. A true fissure vein of gold quartz was opened up and have shown values numbing over \$2000 a ton in gold.

UTAH CON. SMELTER.

A Million Pounds of Steel Begins to Arrive at the Plant.

brick work on the new dust chamber leading from the converter plant at the Highland Boy smelter has been completed, said Manager Channing during the pleted, and analoger channing during the day, while the new and independent stack which is being raised to a height of 189 feet is going up steadily. For the new smelter buildings, in which will be housed two additional reverbatory furnaces and

one converter, the arrival of steel, of which over 1,000,000 pounds will be used, has now begun, these structures, quoting from George K. Fischer, the mechanical engineer, to be completed by April 1st, with all the enlargements to be ready to go into commission by June 1st. To that consummation everything is now moving

THE DAY ON 'CHANGE.

Not Much to Rattle in the Purses of Purses of the Professional.

The day's business on the mining exchange was confined to 30,700 shares of stock that brought but \$3383.87, the commissions but lean pickings for the army of brokers, without reference to the investor who had been forced upon a demoralized market. Of the incon-sistency of the market, the fate of New York afforded the most impressive example, the price of its shares shrinking gradually to the harmony of the most favorable reports from the mine, as did those of Grand Central, which the management declares in as good condition the state of the state physically as at any time in its career. However, the talent had a few choice lots, and down to \$2.85 it was dealt out. with that figure bid at the close. Con. Mercur was stationary around 62 cents, notwithstanding the exploitation of re-ports that its surplus was being steadily encroached upon these days, while Sacramento, with its quicksliver ores showing a valuation of nearly \$200,000, was handed out at 21½ cents, with But-ler-Liberal filling orders around 10½ cents and Star Con. at 21½. While there was considerable sparring over the Daly family traders were generally far apart, while Uncle Sam was marked up to 27 cents and United States to 224. up to 27 cents and United States to \$24. the day closing on the following mar-

Boston Copper Market.

[TRIBUNE SPECIAL]

[TRIBUNE SPECIAL.]

Boston, Jan. 28.—Copper shares continued under pressure, more liquidation making its appearance each day. The market is still dull and practically fearless. Traders are inclined to look on rather than trade. Many commission houses are bare of orders. The weakness in the New York market was reflected in the Boston market here and local issues were inclined to droop. The market continues heavy at the close. Hornblower & Weeks, brokers, 52 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

AT UTAH COPPER.

Big Mill Will Positively Start Before March 1st Next.

From the new developments on the tah Copper company's domain at Bingham continue to come the most gratifying reports, although the local management pleads that the results are but a verificapleads that the results are but a verification of those to which the attention of the
miner and metallurgist was called long
years ago by Col. Enos A. Wall. Superintendent Jamey, who came in from camp
again yesterday, says of the mill that he
has no doubt of his ability to put it in
commission some day between Pebruary
15th and March 1st with construction
progressing as it is at this time, nor has
he any doubt of results that will have
been achieved a few months hence. The
main tunnel is now forging into the hill
under the superintendency of Mr. MacDonald, and with a signal from the plant
the moving of ores in any volume required
will follow.

THE ELLIS METHOD.

Favorable Words on New Process From Inventor's Old Home.

Henry R. Ellis, the well-known assayer and metallurgist, formerly of Nevada, but now of Salt Lake City, is the inventor of present smelling methods and place within reach of even the small mine owner and
the owner of low-grade tailings and ore
dumps the means of earning substantial
profits and at the same time free him
from the chains which bind him to the
operators of custom smelling works, says
the Pacific Coast Miner. By his method
he is saying absolutely all of the lead and
gold and from 80 to 9812 per cent of the
silver contained in the crude ore or tailings. The cost of a plant to handle from
ten to twenty tons per day, Mr. Ellis says,
would be about \$1500 the cost of larger
plants being correspondingly low. Straight
gold, gold and sliver or gold, sliver and a process which promises to revolutionize

GREENBACK'S THRIFT.

\$6.00 Wolverine ... 70.00 10.00 U. Copper .. 6.00

Proposition Affording Its Shareholders \$30,000 Per Month.

A correspondent writing from Grant' Pass, Or., says of a proposition in which there is not a little inetrest in this neck of the woods: The Greenback Gold Mining company, a closed corporation and owner of the famous Greenback mine of the Grave Creek district, has elected its officers for the coming year. William H. Brevoort of New York is president, Eben Smith of Denver, vice-president, and Carrey W. Thompson, formerly of Colorado, superintendent and general manager. The year just closed has been a very successful one for the Greenback. A vast amount of machinery has been put in place and the property shaped for work on a much larger scale than was at first thought possible. Two mills, one of forty and the other of ten stamps, are operated, aside from a 100-ton daily capacity cyanide plant. The Greenback is now paying regular monthly dividends of about \$30,000 Brevoort of New York is president, Eben

RETURNED TO BODIE.

Local Talent Developing Big Gold Mine in the Old Camp.

Capt. Warren Loose has gone to Badie, Cal., where he is again prosecuting active development on the New Bodie Mining ompany's properties, the milling of whose ores will begin the present year. The ores of the New Bodie are maintaining an iverage of \$12 gold per ton, these to be first put over the plates and then into the cyanide tanks, and with this average no difficulty should be experienced in making them the source of regular dividends. For more than a quarter of a century the Standard Minlog company, to which the Mesars, Loose sold, the original Rodie Messrs, Loose sold the original Bodie group, has been distributing dividends, the record disclosing a total of 34,178,000, and it is alongside this that the vendors of the old are now developing the New Bodie, with every assurance of profitable results.

BIG LEAD DISCOVERY.

Ledge of High-Grade Ore Opened Up in the Rives Group

Charles Rives, who, with his brothers, is ngaged in the development of a group of locations out of Pioche, Nev., came in from the zouthwest during the day, bringing with him samples of ore containing as much as 65 per cent lead and running quite well up in silver. Of this class of quite well up in silver. Of this class of ore, which makes ionnage very rapidly, and of which two feet is exposed in ground hitherto undeveloped, two carloads are now at the surface and will in a short time be forwarded as a trial lot Among local interests in that region there was not a little excitement during the day.

Seeking Cause of Smallpox.

Cambridge, Mass., Jan. 28.—Drs. Tyner and Tinkerhoff, who have been assisting Dr. Councilman, the bacteriologist of Harvard university. In recent experiments into the cause of smallpox will leave for Manila soon to continue work there along the lines pursued at Harvard. Besides smallpox, other tropical diseases which are likely to be brought to this land through growing intercourse with the islands will be investigated.

Don't Worry.

This is easier said that done, yet it may be of some help to consider the matter. If the cause is something over which you have no control it is obvious that worrying will not help the matter in the least. On the other hand, if within your control you have only to act. When you have a cold and fear en attack of pneumonia, buy a bottle of Chamberlain's Cough Remedy and use it judiciously and all cause for worry as to the outcome will quickly disappear. There is no danger of pneumonia when it is used. For sale by all druggists.

THE CENTRAL'S RICHES

Old Butterfly Stope Reproduced in Mine.

ITS CONDITION PHYSICALLY

Manager Leese Discourses en the Preparty.

Also Loads Up on Its Shares During the Day-Opening Up Its Wealth on the North.

Of conditions down at the Grand Cen tral of Tintic and of which several packages were thawed out at \$2.85 yesterday, State Senator C. E. Loose, who came in from the mines the pre vious night, says they have never been more gratifying, not even when the "Butterfly stope" was being made to disgorge its wealth and dividends were pouring regularly from that source. The same ores are in evidence, said Manager Loose, but they are now being mined as they come under a more favorable contract for their reduction, and perhaps the general average has been lessened. However, an increased tonnage overcomes this disparity, and results at present are fully as good. At this time the main ore bodies are being this time the main ore bedles are being opened up in the company's territory on the north, and while the January dividend was passed it is said that its equivalent was added to the surplus. When the next dividend will appear, said Manager Loose, is a matter entirely with the directors. By some of the owners of the larger blocks in the Central it is said that the passing of the dividend during the month was quite generally concurred by all interests, and that it means nothing less than that the new ore bodies are to be opened to greater depth, while the upper levels are extended along the strike of levels are extended along the strike of the vein into virgin ground. At all events it is known that while local interests were expressing a willingness to get out yesterday Manager Loose was a buyer, and certainly the market will exact no stronger evidence of his sin-

VISITS THE SMELTER.

Man Who Designed the Murray Plant Sees It in Operation.

After several days among the furnaces of the American Smelting and Refining company's million-dollar plant at Murray, which towers as another monument to his skill, Mr. Auguste Raht, the company's mechanical engineer. the company's mechanical engineer, came up from the furnaces again during the day, much pleased with the manner in which it is behaving under the direction of Superintendent Rhodes. Of the projected copper plant, which Chairman Daniel Guggenheim of the Chairman Daniel Guggenheim of the executive committee said would be reared in the valley the present year, Mr. Raht said he knew nothing official yet; certainly he had not been directed to preceed with construction this month. However, the veteran smelter builder is not of the garrulous kind, and it was not until he had been engaged upon plans for the big plant at Murray for several weeks that he was ready to acknowledge that they were ready to acknowledge that they were for the most efficient smelter in the American's string. The full battlery of furnaces is now in operation, said Mr. Raht, and to provide for them some ore is required.

FROZE UP THE MILL.

Plant on the New Mercur Overcome by the Cold Weather.

The mill on the New Mercur, founded on the remains of the old Geyser-Marion of Mercur, has been frozen up, sald Frank D. Kimball yesterday, the interruption following the initial chean-up, returns from which are promised in op, returns from which are promised in short time. The operations since the new syndicate took possession of the old producer, said Mr. Kimball, have demonstrated that with economical handling there is yet some ore in the group that can be made to afford a margin and the effort to reclaim it is being followed with a great deal of in terest here as well as at camp.

SLIMES EXTRACTION.

New Method Being Effectively Employed in Neighboring State.

Charles Delker of Leadville has devised method of extracting values from th a method of extracting values from the slimes where zinc-lead-iron ores are concentrated, that will appeal to those engaged in the milling of similar material at Park City and elsewhere. He uses a scries of hydraulic gravity separators, whereby the zinc and from settle and discharge at the bottom and the lighter slimes overflow at the top. By reconcentrating in a second and third separator he is said to finally obtain a product of zinc and iron which commands a profitable market price. It is claimed the A. M. W. and A. Y. and Minnie mills are to adont Mr. Delker's method, which will largely increase their percentage of recovery. In these mills most of the lead is doubtless saved by table concentration and the bulk of the finer slime values consists of from and sinc. The specific gravities of the latter two are so nearly equal that a hydraulic separator, such as Mr. Lelker has slevised, can only collect them together, as their thorough separator would not seem possible. But a mass of from zinc concentrates is desired by the zinc buyers who have facilities for slimes where zinc-lead-iron ares are coby the zinc buyers who have facilities separating them.

IN THE DISTRICT COURT OF THE United States for the district of Urah, In the matter of Nels A. Miller, bankrupt.— No. 64 in bankruptoy.—Petition for dis-

No. 034 in bankruptcy.—Petition for discharge.

To the Honorable John A. Marshall, Judge of the District court of the United States for the district of Utah.

Nels A. Miller of Sait Lake City, in the county of Sait Lake and State of Utah, in said district, respectfully represents that on the 11th day of July last past he was duly adjudged bankrupt under the acts of Congress relating to bankruptcy; that he has duly surrendered all his property and rights of property, and has fully compiled with all the requirements of said acts and of the orders of the court touching his bankruptcy.

Wherefore he prays that he may be de-

ing his bankruptey.

Wherefore he prays that he may be decreed by the court to have a full discharge from all debts provable against his estate under said bankrupt acts, except such debts as are excepted by law from such

discharge.
Dated this 28th day of January, A. D.
NELS A. MILLER,
Bankrupt.

ORDER OF NOTICE THEREON.

District of Utah.

On this 28th day of January A. D. 1804, on reading the foregoing ostition, it is ordered by the court that a hearing he had upon the same on the 12th day of February A. D. 1804, before said court, at Sait Lake City, in said district, at 16 o'clock in the forenoon, and that notice thereof be published in The Sait Lake Tribine, a newspaper printed in said district, and that all known creditors and other persons in interest may appear at the said time and place and show cause, if any they have, why the prayer of the said petitioner should not be granted.

And it is further ordered by the court that the clerk shall send by mall to all known creditors copies of said petition and this order, addressed to them at their places of residence as stated.

Witness the Honorabic John A. Marshall, Judge of the said Elistrict court, and the seal thereof, at Sait Lake City, in said district, on the 28th day of January, A. D. 1804.

Attest: JERROLD R. LETCHER, [Seal of Court.] Cleri
